

# QOTIPH ALBYAYADH

---

Amman, Jordan | Khaledbyayadh@gmail.com | +962 78 203 5883

GitHub: [gotiph10](#) | LinkedIn: [Qotiph Albyayadh](#)

## EDUCATION:

---

2022 - 2026 | Mutah University

Bachelor's degree, Software Engineering

## SKILLS:

---

- **Languages:** C++, Java, C#, JavaScript, TypeScript, PHP, Visual Basic.NET, SQL.
- **Frontend:** React.js, SASS, CSS, HTML, Responsive Design.
- **Backend & Tools:** Spring Boot, .NET/ASP.NET, MySQL, SQL Server, Git/GitHub, Postman.
- **Specialized:** Data Structures, Algorithms, OOP, RESTful API Design.

## ACHIEVEMENTS & CERTIFICATES

---

- ICPC Jordanian Collegiate Programming Contest (Top 10% of teams):  
2023: Ranked #32 nationally ([Certificate](#)).  
2024: Ranked #33 nationally ([Certificate](#)).
- Participated in the 2024 Programming Contest Robbing Balloons 2 and ranked #22
- Participated in IEEEExtreme 18.0 Programming Competition ([Certificate](#))
- Ranked #1 three times consecutively at Mutah University for the best team in problem solving

## PROJECTS:

---

**Quiz AI | Senior Project** *React.js, C#, .NET, SQL Server, TinyLlama AI, Git*

- **Developed a full-stack AI-driven quiz generator** designed to modernize exam preparation by transforming user study materials into high-quality, customized practice questions.
- **Fine-tuned the TinyLlama AI model** to ensure the generation of contextually accurate and pedagogically sound questions tailored to specific academic subjects.
- **Engineered a robust backend API using C# and SQL Server**, implementing a Client-Server architecture to manage secure data persistence and complex quiz logic.
- **Orchestrated complex frontend data flows** in React.js, ensuring a seamless user experience while handling large volumes of generated content and real-time AI responses.
- **Streamlined development cycles** by using Postman for API mocking, allowing for decoupled frontend and backend progress and efficient integration testing.

**Mutah Guide** *React.js, PHP, MySQL, SASS*

- **Architected a centralized academic platform for Mut'ah University** students to streamline access to study materials, solutions, and institutional FAQs.
- **Designed and implemented a responsive frontend using React.js and SASS**, prioritizing intuitive navigation and cross-device compatibility.
- **Secured user data and academic resources** by implementing a custom authentication system (Login/Signup) using PHP and MySQL.
- **Optimized resource discovery by building a search functionality** that allows students to quickly retrieve specific PDFs and lecture notes from the backend repository.

## **VOLUNTEERING & LEADERSHIP:**

---

### **Community Founder & Lead | Discord Education Server**

- Founded and manage a technical community of 500+ members, providing a platform for academic assistance and peer-to-peer learning for university students.
- Mentor junior developers by leading dedicated sessions on problem-solving strategies and coding best practices, leveraging expertise gained from national programming contests.
- Facilitate knowledge sharing by moderating discussions on complex Software Engineering topics including Algorithms and Data Structures.

### **Student Member | IEEE Jordan Section**

- Active Student Member (ID: 99693220) within the Jordan Section , engaging with professional networks to advance technical goals.
- Committed to technical excellence and professional ethics as part of the world's largest technical professional organization for advancing technology.

## **LANGUAGES:**

---

Arabic – Native

English – Professional working proficiency
